Cryptographic information application

Page 21, 8.2.17

Replace the paragraph beginning “The **applicationName** component ... ” with the following:

“The **applicationName** component is intended to contain the name of the application to which the data container object in question ‘belongs’.

The **applicationOID** component is intended to contain the registered object identifier for the application to which the data container object in question ‘belongs’.

In order to avoid application name collisions, at least the **applicationOID** alternative is recommended. As indicated in ASN.1, at least one of the components has to be present in a value of type **CommonDataContainerObjectAttributes**.”
